

GARY A.I.

Product Breakdown for Designers

Every Game. Everyday. Always Free.

What is Gary A.I.?

Gary A.I. is an iOS sports betting analysis app powered by artificial intelligence. It provides daily game picks, player prop suggestions, DFS lineups, and a full March Madness bracket — all backed by data-driven reasoning, real stats, and transparent analysis. The app is completely free and covers 8+ sports.

Gary is NOT a sportsbook. No real money, no deposits, no withdrawals. It's an intelligent analysis tool that helps bettors make smarter decisions by showing them exactly why Gary likes each pick — the stats, the injuries, the angles, and the contradicting factors.

Think of Gary as the sharp friend who's done all the research and shows his work.

Core Value Proposition

- AI-powered picks with full transparency — every pick shows the reasoning, stats, and contradictions
- Covers NBA, NFL, NCAAB, NCAAF, NHL, EPL, MLB, and WNBA
- Player props with key stat breakdowns for every suggestion
- Optimized DFS lineups for DraftKings and FanDuel with pivot alternatives
- Interactive March Madness bracket with confidence ratings on every matchup
- Built-in performance tracker (Billfold) — win rate, net units, streaks, candlestick charts
- Multi-sportsbook odds comparison — find the best line across DraftKings, FanDuel, Caesars, BetMGM, etc.
- Completely free — no paywall, no subscriptions, no ads

Target Audience

- Sports bettors who want data-driven analysis, not gut feelings
- DFS players looking for optimized lineups with salary strategy
- Casual fans who want help filling out their March Madness bracket
- Anyone who wants to understand WHY a pick makes sense, not just WHAT to bet

Tagline & Key Messages

- Tagline: "Every Game. Everyday. Always Free."
- CTA: "Full slate of Gary's picks are live. Every game covered. Completely free."
- Positioning: "Meet Gary AI — your intelligent sports betting analyst"
- Tone: Confident, concise, data-driven. Speak like a sharp bettor, not a marketing department.

App Structure — 6 Main Screens

Gary uses a compact floating tab bar at the bottom with 6 main sections:

1. HOME — Dashboard & Mood

- Gary's Mood: A dynamic character illustration that changes based on yesterday's win rate (Fire for 80%+, Cooking for 70%+, Beer for 60%+, Worried for 50%+, Ice Cold for 40%+, Doomsday for <40%)
- Recent Wins Ticker: Scrolling marquee of recent winning picks
- Yesterday's Performance: Win-loss record with sport-by-sport breakdown
- Today's Top Picks: Highest confidence game pick + top prop pick preview
- What's New: Quick-access pills to Bracket, new sports, Props
- How Gary Works: Tabbed carousel explaining each feature (Picks, Props, Billfold, Analysis)
- Social Links: Website, contact, responsible gambling resources

2. PICKS — Daily Game Picks

- Sport filter tabs: NBA, NFL, NCAAB, NCAAF, NHL, EPL, MLB, WNBA + ALL
- Conference filter for NCAAB (Big Ten, SEC, ACC, etc.)
- Picks grouped by game time with time slot headers
- Each pick card shows: Teams, venue, pick text (gold), odds, confidence level, badges, result stamp
- Tap any card to expand full analysis: rationale, Tale of Tape stats, injuries, thesis, supporting/contradicting factors, sportsbook odds comparison across multiple books
- Special badges: NFL context (SNF/MNF/Playoffs), NBA Cup, CFP Round, BETA, Game Significance (Rivalry, Top 5 Battle, etc.)

3. PROPS — Player Prop Picks

- Same sport filter as Picks, plus special NFL TDs category
- NFL TDs split into: Standard, Value (+200+ odds), First TD Scorer
- Props grouped by matchup with game time headers
- Each prop shows: Player name, team, prop type & line (e.g. 'Points Over 18.5'), odds, confidence, 3-4 key supporting stats
- Tap to expand: Full rationale, supporting stats, sportsbook odds table

4. BRACKET — March Madness

- Full 68-team interactive bracket visualization
- Four regions (East, West, South, Midwest) with connector lines
- Round headers with date ranges, venue labels
- Tap any matchup: Gary's pick, confidence, rationale, pro/con breakdown, ATS pick + spread, upset alerts
- Visual result markers (green = correct, red = wrong) as tournament progresses
- Gary's Final Four and Championship picks shown at bracket center

App Structure (Continued)

5. FANTASY — DFS Lineups (Gary's Fantasy)

- Platform toggle: DraftKings vs FanDuel (with brand colors/icons)
- Sport picker: NBA, NFL
- Slate picker: Main, Turbo, Night, After Hours
- Live stats toolbar: Salary used/cap, projected points, ceiling projection, game count
- 8-position lineup display: Each player shows name, team, salary, projected points
- Tap any player to expand: Rationale, supporting stats, ownership %, value score, recent form, DVP rank, revenge game flag, back-to-back flag, usage boost, blowout risk
- NFL-specific: Snap count %, target share, red zone targets, weather impact
- Pivot alternatives for each player: Direct Swap, Mid Value (saves ~\$1K), Budget Play — each with salary diff and rationale
- Gary's Analysis Card: Build thesis, harmony reasoning, archetype (e.g. 'Stars & Scrubs')

6. BILLFOLD — Performance Tracking

- Three tabs: Game Picks Performance, Player Props Performance, Top Pick (TOPD) Analysis
- Core metrics: Record (W-L-P), Win Rate %, Net Units, Current Streak
- Sport filter + timeframe selector: 7d, 30d, 90d, YTD, All-time
- Candlestick chart: Daily profit/loss visualization with open/high/low/close — zoomable and scrubbable
- Recent Results Carousel: Auto-rotating display of last 20 results with W/L stamps
- Sport Breakdown: Net units and win rate per sport, sorted best to worst
- Spread Size Performance: Win rate grouped by spread bucket (e.g. NBA 1-3, 4-6, 7-9, 10+)

Settings (Gear Icon — All Screens)

- What's New / Changelog
- Account: Sign in/out, display name, email
- Legal: Privacy Policy, Terms of Service, Responsible Gambling, Contact Support
- Version info from app bundle

Pick Card — Information Architecture

The pick card is the core UI element of the app. Every game pick follows this structure:

Card Front (Collapsed View)

- Badges row: NFL context (SNF/MNF/TNF/Playoffs), NBA Cup, CFP Round, BETA, Game Significance
- Game time / time slot
- Teams: Away @ Home (with optional seeds, AP rankings, conference)
- Venue: Map icon + location name
- Pick text: Large, bold, gold-colored (e.g. 'Lakers -8.5') — auto-scales for long names
- Odds: American format, right-aligned (e.g. '-110')
- Confidence indicator: Visual gauge, 0-100 scale
- Result stamp (if settled): 'W' green, 'L' red, 'Push' gray

Card Expanded (Tap to Open)

- Gary's Rationale: Full prose explanation of why this pick was made
- Tale of Tape: Head-to-head stat comparison table (home vs away) — PPG, RPG, APG, 3P%, TS%, Net Rating, Pace, and 15+ more depending on sport
- Injuries: Full injury reports for both teams (player name, status, description)
- Thesis Type: 'Clear Read' (strong conviction), 'Found Angle' (market edge), 'Educated Lean' (moderate), 'Coin Flip' (low conviction)
- Thesis Mechanism: One sentence explaining WHY this team wins
- Supporting Factors: Array of pro arguments backing the pick
- Contradicting Factors: Major concerns + minor concerns listed separately
- Sportsbook Odds Table: Spread + ML across DraftKings, FanDuel, Caesars, BetMGM, etc. — user can identify best value
- Trap Alert: Warning flag for potentially tricky lines

Prop Card Structure

- Player name (bold) + team abbreviation
- Prop type & bet: e.g. 'Points Over 18.5', 'Anytime TD'
- Odds + confidence rating
- 3-4 key stats: Supporting statistics as bullet points (e.g. 'PPG: 25.3', 'vs this defense: 28.1 avg')
- Expanded view: Full rationale + sportsbook odds table

Gary's Mood System

Gary is a character — a golden bear with sunglasses and a cigar. His mood changes daily based on yesterday's pick performance. This is the emotional heartbeat of the app and drives user engagement on the Home screen.

Mood Tiers (Based on Yesterday's Win Rate)

80%+ Win Rate	GaryFire	Fire/rage glow — Gary's on a heater
70-79% Win Rate	GaryCooking	Cooking glow — Gary's in the kitchen
60-69% Win Rate	GaryBeer	Chill glow — solid day, cracking a beer
50-59% Win Rate	GaryWorried	Yellow/concerned glow — break even vibes
40-49% Win Rate	GaryIceCold	Ice blue glow — cold streak
<40% Win Rate	GaryDoomsday	Purple doomsday glow — rough day
No Data	GaryIconBG	Standard gold glow — default/neutral

Each mood has a corresponding character illustration asset and a matching glow color shadow effect on the Home screen. The mood creates a daily emotional hook that brings users back to check how Gary's feeling.

Confidence & Thesis System

Every pick has a confidence score (0-100) and a thesis classification:

Clear Read

Highest conviction — strong data alignment, few contradictions. Base score: 1000

Found Angle

Market edge identified — Gary sees something the line doesn't reflect. Base score: 700

Educated Lean

Moderate conviction — data supports the pick but with notable unknowns

Coin Flip

Low conviction — included for coverage but use caution

Top Pick of the Day (TOPD): Either manually flagged by the system or auto-selected as the highest confidence pick. Tracked separately in the Billfold with its own W-L record.

Sports & Leagues Covered

NBA

National Basketball Association — spreads, moneylines, player props, DFS lineups, NBA Cup context

NFL

National Football League — spreads, moneylines, player props, TD props (Standard/Value/First TD), DFS lineups, game context (SNF/MNF/TNF/Playoffs/Super Bowl)

NCAAB

College Basketball — spreads with conference filtering, AP rankings, seeds, dedicated March Madness bracket, tournament context

NCAAF

College Football — spreads, CFP round tracking, seeds, bowl game context

NHL

National Hockey League — moneylines, puck lines, player props

EPL

English Premier League (Soccer) — match picks, spreads

MLB

Major League Baseball — moneylines, run lines, player props. Also covers WBC (World Baseball Classic)

WNBA

Women's National Basketball Association — spreads, moneylines

Special Tournament Contexts

- March Madness: Full interactive 68-team bracket with Gary's predictions, confidence, and upset alerts
- NBA Cup: In-Season Tournament badge and context on affected picks
- College Football Playoff (CFP): Round tracking, seed display, playoff context
- World Baseball Classic (WBC): International matchup flagging
- Rivalry/Significance: Automatic badges for Division Rivals, Top 5 Battles, International Games

Onboarding, Auth & Notifications

First-Time User Flow

- Step 1 — Disclaimer Modal: Legal warning about sports betting + responsible gambling disclaimer. User must tap 'I Understand' to proceed.
- Step 2 — Landing Screen: Large Gary logo with animations, app tagline ('Intelligent Sports Analysis'), tech capability chips (Gemini Pro AI, Agentic AI, Multi-Book Odds, Live Search, Scout Reports, Live Stats)
- Step 3 — Three CTAs: 'Access Picks' (gold primary button), 'See Today's Picks' (secondary), 'Sign In' (tertiary)
- Auth is optional — users can browse all picks without creating an account

Authentication

- Optional email/password sign-in via AuthView
- All features work without signing in
- Signed-in users: Name + email displayed in Settings, sign-out option

Push Notifications

- Firebase Cloud Messaging (FCM) + Apple Push Notification Service (APNs)
- Permission requested on first launch
- Device token stored in Supabase for targeted push delivery
- Use cases: Daily picks are live, POTD announcement, bracket updates, results alerts

Tech Stack (For Context)

- Backend: Supabase (PostgreSQL + REST API + Edge Functions)
- AI: Gemini Pro for analysis generation
- Research: Perplexity AI for context & live data
- Odds: The Odds API for real-time multi-book odds
- Push: Firebase Cloud Messaging
- Platform: iOS native (SwiftUI)

Legal Disclaimers (Always Present)

- "For informational and entertainment purposes only"
- "Does not place bets or process payments"
- "Must be legal age and comply with local laws"
- Responsible Gambling helpline: 1-800-522-4700

Summary — The Core Loop

Gary A.I. is built around a simple daily loop that keeps users engaged:

1. BROWSE PICKS

Every morning, Gary drops a full slate of game picks, props, and DFS lineups across all active sports.

2. READ THE REASONING

Users tap into any pick to see the full analysis — stats, injuries, thesis, contradicting factors, and multi-book odds.

3. MAKE DECISIONS

Armed with Gary's data-driven reasoning, users decide what to bet (on their own sportsbook — Gary doesn't handle money).

4. TRACK RESULTS

The Billfold automatically tracks every pick's result — win rate, net units, streaks, sport breakdowns, and candlestick charts.

5. COME BACK TOMORROW

Gary's mood updates based on yesterday's performance. The cycle repeats with fresh picks every day.

The app's personality comes from Gary himself — a golden bear who celebrates wins, owns losses, and always shows his work. Every ad, post, and marketing material should reflect this: confident, transparent, data-driven, and never afraid to take the L publicly.
